

# YASH CHARDE

AI Engineer | Pune, India

+91-9479686130 | [yashraj.charde@gmail.com](mailto:yashraj.charde@gmail.com) | [linkedin.com/in/yash-charde-935976254](https://www.linkedin.com/in/yash-charde-935976254) | [github.com/yashcharde11](https://github.com/yashcharde11)

## SUMMARY

B.Tech graduate in Artificial Intelligence (2026) with internship experience building AI agents, chatbots, and LLM applications using Python, LangChain, LangGraph, and RAG pipelines. Built a multi-agent Data Analyst Agent at Orion Innovation that cut manual work for the support team by 40%. Looking for an AI Engineer role.

## TECHNICAL SKILLS

- **Languages:** Python, SQL
- **AI & LLM:** LangChain, LangGraph, RAG Pipelines, Prompt Engineering, LLM Fine-Tuning, MCP (Model Context Protocol), Microsoft Agent Framework, AI Red-Teaming
- **Machine Learning & NLP:** Machine Learning, Scikit-learn, NLTK, Natural Language Processing
- **Backend & APIs:** Azure OpenAI, Anthropic Claude API, FastAPI, Flask, Streamlit, REST APIs
- **Databases & Vector Storage:** PostgreSQL, MySQL, ChromaDB, Vector Databases, SQLAlchemy
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau
- **Version Control:** Git, GitHub

## PROFESSIONAL EXPERIENCE

### AI/ML Intern – Orion Innovation, Pune

Jan 2026 – Present

- Building on an enterprise multi-agent AI platform that automates routine work for support engineers; my main project is an autonomous Data Analyst Agent.
- Users upload any file (Excel/CSV) and ask a question in plain English, and the agent returns a styled, multi-sheet Excel report with no manual analysis needed.
- Designed a 7-stage multi-agent pipeline (refine query, validate data, analyze, business insights, reasoning, build report) using Python, Azure OpenAI, and the Microsoft Agent Framework, run through a single orchestrator.
- Kept results accurate by computing all stats in Pandas and DuckDB instead of letting the model guess, and added a retry guard that reruns the reasoning step up to 3 times until the JSON output is valid.
- Made agent behavior configurable through plain-text prompt files, so teammates can adjust it without changing code; reduced manual work for the support team by 40% and improved task completion speed.

### Research Intern – VNIT (NIT), Nagpur

Jun 2025 – Jul 2025

- Worked on Small Language Models (SLMs) — lightweight, lower-cost alternatives to large LLMs for focused tasks.
- Fine-tuned a small model on a college dataset (admissions, courses, facilities) to improve answers for domain-specific questions.

## PROJECTS

### Large-Scale City Partitioning using Memory-Efficient Unsupervised Learning

[GitHub](#)

- Built a data processing system that divides a city into smaller zones to help a taxi booking app predict ride demand by time and location.
- Processed a 6 GB dataset using Mini-Batch K-Means clustering with the partial-fit method to train on data in small, memory-friendly chunks.

### Hotel Management AI Chatbot

- Created a multi-agent AI assistant that handles hotel bookings, check-ins, and check-outs automatically, like a digital receptionist.
- Built it with LangChain, LangGraph, and Llama 3.3, connected to a secure SQL database (SQLAlchemy) to manage room availability and guest records.

### Cricket Player Performance Dashboard

[GitHub](#)

- Developed an interactive Power BI dashboard to analyze cricket player performance statistics.
- Cleaned and transformed 5,000+ raw data points from Excel sheets using Power Query (ETL), and created clear KPI visuals for Strike Rate, Batting Average, and Boundary Frequency.

## EDUCATION

### B.Tech in Artificial Intelligence

2022 – 2026

St. Vincent Pallotti College of Engineering and Technology, Nagpur | CGPA: 8.77 / 10

### Higher Secondary Certificate (HSC) – Macro Vision Academy, Madhya Pradesh | 89.2%

2021

### Secondary School Certificate (SSC) – RD Public School | 93.6%

2019

## CERTIFICATIONS AND COURSES

- Natural Language Processing – NPTEL, IIT Kharagpur (2024) [\[Link\]](#)
- Business Intelligence & Analytics – NPTEL, IIT Madras (2024) [\[Link\]](#)
- Claude 101: Introduction to Claude – Anthropic [\[Link\]](#)
- Claude Code 101: Introduction to Claude Code – Anthropic [\[Link\]](#)
- Get Started with Generative AI – Intel Unnati (2025) [\[Link\]](#)
